

# Excel

## Conditional highlighting with functions

This is a collection of frequently used functions for conditional highlighting in Excel.

Highlight cells that are formatted dates and the dates are older than X days. Applies to =\$A:\$A if all dates you want highlighted are in the A column.

```
=IF(LEFT(CELL("format",A1),1)="D",IF(A1<TODAY()-37,TRUE,FALSE),FALSE)
```

:end
