

Ansible and pipx

The easiest way to make an up-to-date installation is by using pipx:

```
# initial installation
pipx install --include-deps ansible
pipx ensurepath
pipx completions
pipx inject ansible ansible-lint
pipx inject ansible jmespath
pipx inject ansible librouters
pipx inject ansible paramiko
```

```
# future upgrades
pipx upgrade --include-injected ansible
```
