Axis camera packet capture

Download network trace

[Source](#)

According to documentation this can be done via the URL below, as well as via the web interface in newer AXIS OS versions.

pcapdump URL

[Source](#)

1. Open any browser and paste the following URL:
   http://CA.ME.RA.IP/axis-cgi/debug/debug.tgz?cmd=pcapdump&duration=60
   (Substitute the "CA.ME.RA.IP" with the IP address of the device.)
2. The browser will ask for credentials. The default ones are: `root/pass` .
3. Once you enter the credentials, a download will start. It will last for `60` seconds. Note that the last part of the URL (`"duration="`) will determine the amount of time the capture will run — you can change this number as needed.
4. Once finished, the file will be usually saved to the computer's `Downloads` folder.

via the web interface

1. Open the camera's web interface.
2. Go to Settings -> System -> Maintenance
